A POSSIBLE ERROR ABOUT MISSING FILES

This program is written in Visual Basic 6.

When you try to run the program it might throw up an error message about missing file(s).

You have two options:

1 Simply double click the file included here called:

vbrun60-setup

Double-click it to run. It's a self-extracting file that will add the necessary files to Windows.

OR

2 Download the file directly from Microsoft via this link

<http://www.microsoft.com/en-us/download/details.aspx?id=10019>

Double-click it to run. It's a self-extracting file that will add the necessary files to Windows.
